

Purpose

This document provides you with key information about this investment fund. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this portfolio and to help you compare it with other investment funds.

Product

Sustainable Global Thematic Portfolio

a sub-fund of AB SICAV I

Class I Shares (ISIN: LU0592692593)

AB SICAV I is an open-ended investment company with variable capital (*société d'investissement à capital variable*) and is managed by AllianceBernstein (Luxembourg) S.à r.l., a member of the AllianceBernstein Group, which is authorised in Luxembourg, and regulated by the *Commission de Surveillance du Secteur Financier* (CSSF). For more information on this Fund, please refer to www.alliancebernstein.com or call +352 46 39 36 151.

This document was published on 02/01/2023.

What is this product?

Type

This is an investment fund.

Investment objective

The Portfolio seeks to increase the value of your investment over time through capital growth.

Investment policy

Under normal market conditions, the Portfolio typically invests at least 80% of its assets in equity securities of issuers that the Investment Manager believes are positively aligned with sustainable investment themes. These companies may be of any market capitalisation and from any country, including emerging markets. The Portfolio usually invests in at least three different countries and at least 40% in equity securities of non-US companies.

The Investment Manager invests in securities that it believes are positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN Sustainable Development Goals (UN SDGs).

The Investment Manager emphasises positive selection criteria, in particular by analysing the exposure to environmental, social and governance (ESG) factors of each security or issuer, over broad-based negative screens in assessing an issuer's exposure to such ESG factors.

The Portfolio may be exposed to any currency.

The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and for investment purposes.

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Emerging market countries: Nations whose economies and securities markets are less established.

Equities: Securities that represent an ownership stake in a company.

Other investment purposes: In line with the Portfolio's investment objective and policy, means to gain exposure.

Sustainable investment themes: Those investment themes that are derived from the UN SDGs such as Health, Climate, and Empowerment. Sustainable investment themes may change over time.

UN Sustainable Development Goals ("UN SDGs"): A set of 17 goals that represent the United Nations' aspirational view of how the world could look like by 2030. The 17 goals address economic prosperity, environmental sustainability and social inclusion.

Responsible investing

The Portfolio is classified as Article 9 under Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR). For more information, please refer to the SFDR Pre-Contractual Disclosures in the Fund's prospectus.

Benchmark

MSCI All Country World Index (ACWI) used for performance comparison.

The Portfolio is actively managed and the Investment Manager is not constrained by its benchmark. Please see the Fund's prospectus for more information.

Intended retail investor

The Portfolio is intended for retail and institutional investors.

Portfolio currency

The reference currency of the Portfolio is USD.

Share class currency

The reference currency of the share class is GBP.

Distribution policy

This share class is a non-distributing share class. Income and capital gains derived from the Portfolio are reinvested.

Redemption

Shares may be redeemed on any day when both the New York Stock Exchange and Luxembourg banks are open for business (each a Business Day). The latest price units and other practical information for this Portfolio can be found at: www.alliancebernstein.com

Depository

Brown Brothers Harriman (Luxembourg) S.C.A.
80, route d'Esch, L-1470 Luxembourg

What are the risks and what could I get in return?

Risk

Lower risk

Higher risk

The risk indicator assumes you keep your investment in the Portfolio for 5 years.

This is the recommended holding period for this Portfolio.

You may not be able to sell your shares easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator (SRI) is a guide to the level of risk of this Portfolio compared to other investment funds. It shows how likely it is that the Portfolio will lose money because of movements in the markets.

The Portfolio is classified as 4 out of 7, which is a medium risk class.

Risks materially relevant to the Portfolio but not adequately captured by the SRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk: If an entity with which the Portfolio does business becomes insolvent, payments owed to the Portfolio could be delayed, reduced and/or eliminated.

Currency risk: In the event of a share class denominated in a different currency than the investor's local currency, the return of the investor will be impacted by the exchange rate between the share class currency and the investor's local currency.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.

You can find more information about the other risks in the Fund's prospectus at: www.alliancebernstein.com

Performance Scenarios

What you will get from this share class depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the share class over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. If applicable, for any periods before the share class activation/reactivation a similar share class proxy was used to replicate expected returns.

For the 5 years unfavourable, moderate, and favourable scenarios the period of returns selected are July 2021 - July 2022, February 2017 - February 2022, April 2016 - April 2021, respectively.

Recommended holding period:	5 years	
Example Investment:	10,000 GBP	
	If you exit after 1 year	If you exit after 5 years

Scenarios			
Minimum	There is no minimum guaranteed return and you could lose some or all of your investment.		
Stress	What you might get back after costs	1,340 GBP	1,410 GBP
	Average return each year	-86.6%	-32.4%
Unfavourable	What you might get back after costs	8,750 GBP	9,580 GBP
	Average return each year	-12.5%	-0.9%
Moderate	What you might get back after costs	11,300 GBP	19,350 GBP
	Average return each year	13.0%	14.1%
Favourable	What you might get back after costs	15,140 GBP	25,230 GBP
	Average return each year	51.4%	20.3%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest GBP 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other investment funds.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The figures shown include all the costs of the share class itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if AllianceBernstein (Luxembourg) S.à r.l. is unable to pay out?

For your protection, the Portfolio's assets are held with a separate company, the depositary, so the Portfolio's ability to pay out would not be affected by the insolvency of AllianceBernstein (Luxembourg) S.à r.l.. If the Portfolio is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

Costs over time: The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold your investment in the Portfolio. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the share class performs as shown in the moderate scenario;
- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	288 GBP	1,689 GBP
Annual cost impact (*)	2.9%	1.9% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.0% before costs and 14.1% after costs.

The person advising on or selling you this Portfolio may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

We may share part of the costs with the person selling you the Portfolio to cover the services they provide to you.

Composition of costs: The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This will be 1.50% of the amount you pay when entering this investment. This is the most you will pay, and you could pay less.	Up to 150 GBP
Exit costs	There is no exit fee charged on the share class.	0 GBP
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.06% of the value of your investment per year. This is an estimate based on actual costs over the last year.	106 GBP
Transaction costs	0.30% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments of the Portfolio. The actual amount will vary depending on how much we buy and sell.	30 GBP
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this share class.	0 GBP

How long should I hold it and can I take money out early?

The Portfolio has no required minimum holding period but is designed for long-term investment; an investment period of minimum 5 years is recommended. Shares in the Portfolio can be purchased and redeemed on each Business Day. For practical information, please refer to the "What is this product?" section.

How can I complain?

Please refer to www.alliancebernstein.com/go/Complaint-Policy

Other relevant information

You may obtain free of charge the prospectus in English, French and German, the latest annual and semi-annual reports in English and German, as well as the Net Asset Value (NAV) of the shares at the registered office of the Management Company or online at www.alliancebernstein.com

Past performance: Past performance information for this share class is available at: www.alliancebernstein.com

Tax Legislation: The Fund is subject to the tax laws and regulations of Luxembourg and this might have an impact on your personal tax situation depending on your country of residence.

This key information document will be updated at least every 12 months following the date of the initial publication, unless there are any ad hoc changes.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Europe ex UK Ethical Equity Fund, a Sterling denominated sub fund of the abrdn OEIC V, Platform 1 Acc Shares (ISIN: GB00B3N24788). This fund is managed by abrdn Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate growth over the long term (5 years or more) by investing in European equities (company shares) which adhere to the abrdn Europe ex UK Ethical Equity Investment Approach.

Performance Target: To achieve the return of the FTSE World Europe ex UK Index plus 2% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in European countries or companies that derive a significant proportion of their revenues or profits from European operations or have a significant proportion of their assets there.

- European countries can include the emerging markets of Europe, but excludes the UK.

- All investments will adhere to the abrdn Europe ex UK Ethical Equity Investment Approach available on www.abrdn.com under "Sustainable Investing".

- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

- The fund will invest at least 70% in companies that the abrdn ESG House Score quantitatively identifies as having superior ESG characteristics in a global context. This analysis covers areas such as human rights, labour rights, environmental safeguards and combating bribery and corruption. The approach utilises abrdn's equity investment process, where companies invested in are given an overall quality rating, a component of which is the ESG Quality Rating which enables the management teams to qualitatively identify and avoid ESG laggards.

- As part of the approach the fund applies a set of company exclusions which are related but not limited to animal testing, weaponry, pornography, gambling, tobacco and alcohol.

Management Process

- The fund management team use their discretion (active management) to maintain a concentrated asset mix at country, sector and stock level.

- Their primary focus is on stock selection using research techniques to select individual companies where the management team have a different view than that of the market, and which align with their views regarding future economic and business conditions.

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction.

- Through the application of the abrdn Europe ex UK Ethical Equity Investment Approach the fund is expected to have a lower carbon intensity than the FTSE World Europe ex UK Index.

- This approach reduces the benchmark investable universe by a minimum of 20%.

- In seeking to achieve the Performance Target, the FTSE World Europe ex UK Index is used as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index, is not ordinarily expected to exceed 9%. Due to the ethical nature of the management process, there are a material number of stocks and sectors in the FTSE World Europe ex UK Index that the fund is unable to invest in, which means the fund's performance profile may deviate significantly from that of the FTSE World Europe ex UK Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").

- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares. Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater

political, tax, economic, foreign exchange, liquidity and regulatory risks.

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.90%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/01/2022.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

abrnd Europe ex UK Ethical Equity Fund, Platform 1 Acc Shares, 31 December 2021

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 2007. The share/unit class was launched in 2012.

Performance Target – FTSE World Europe ex UK (GBP) +2.00%.

PRACTICAL INFORMATION

Name of Depositary: Citibank UK Limited, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB.

Further information about abrnd OEIC V (Prospectus, report & accounts) can be found at www.abrnd.com, where documents may be obtained free of charge.

Other practical information (e.g. where to find latest share prices) can be found in documents held at www.abrnd.com.

Details of the up to date remuneration policy which includes a description of how remuneration and benefits are calculated, the identities of the persons responsible for awarding remuneration and benefits and the composition of the remuneration committee, are available at www.abrnd.com and a paper copy will be available free of charge upon request from abrnd Fund Managers Limited.

Prospective investors should consult their own professional advisers on the potential tax consequences of acquiring, holding or selling shares. abrnd Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the abrnd OEIC V.

Other share classes are available in the fund and further information about these can be found in the prospectus for abrnd OEIC V.

abrnd OEIC V is an umbrella structure comprising a number of different sub funds, one of which is this fund.

This document is specific to the fund and share class stated at the beginning of this document. However, the Prospectus, annual and half-yearly reports are prepared for the entire umbrella.

The assets of a sub fund within the umbrella belong exclusively to that sub fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body including abrnd OEIC V and any other sub fund. Any liability incurred on behalf of or attributable to any sub fund shall be discharged solely out of the assets of that sub fund.

Investors may switch their shares in the fund for shares in another sub fund within abrnd OEIC V. For further information please refer to the prospectus (section on 'Switching') which can be found at www.abrnd.com.

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Baillie Gifford Positive Change Fund - Class B Shares

Accumulation Shares - ISIN GB00BYVGKV59 (also representative of Income Shares - ISIN GB00BYVGKX73)

This Fund is a sub-fund of Baillie Gifford Investment Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Policy

- The Fund will invest at least 90% in shares of companies of any size, any country and in any sector, whose products or behaviour make a positive impact on society and / or the environment in the investment managers opinion.
- The Fund will invest in companies addressing critical challenges in areas such as, but not limited to; education, social inclusion, healthcare and the environment.
- The Fund will be actively managed and will be concentrated.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - The Fund invests in emerging markets where difficulties in trading and custody of assets could arise, impacting your investment.
 - The Fund's concentrated portfolio relative to similar funds may result in large movements in the share price in the short term.
 - The Fund invests in companies whose products or behaviour make a positive impact on society and/or the environment. This means the Fund will not invest in certain sectors and companies and the universe of investments available to the Fund will be more limited than other funds that do not apply such criteria. The Fund therefore may have different returns than a fund which has no such restrictions.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.53%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Accumulation shares and is at 31/12/2021.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

What is this product?

Type

This product is a UCITS sub-fund of Brown Advisory Funds Plc. The Fund's assets are held through its Depository, which is Brown Brothers Harriman Trustee Services (Ireland) Limited.

Investment Objective

The Fund aims to achieve capital growth.

Investment Policy

The Fund aims to achieve its investment objective by investing at least 80% of its net assets in equity securities of US companies that the Investment Manager considers have sound fundamentals and business models which are sustainable over the long-term. The Fund invests primarily in the securities of medium and large capitalisation companies that the Investment Manager considers (1) have prospects for above average earnings growth in the future, and (2) effectively implement sustainable business strategies that drive earnings growth. The equity securities in which the Fund principally invests are common stocks. The Fund may also invest in non-US securities, American and Global Depository Receipts, US treasury bills, fixed and/or floating rate US government securities, real estate investment trusts and unlisted securities.

Medium and large capitalisation companies are, according to the Investment Manager, those companies with market capitalisations generally greater than \$2 billion at the time of purchase. The Fund may also invest a portion of the portfolio in equity securities of small market capitalisation companies.

The Investment Manager has determined that the Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR). The equity securities in which the Fund invests are screened based on certain SRI criteria in accordance with various principles set out in declarations and conventions signed by the international community, including, but not limited to, the ten United Nations Global Compact Principles whose purpose is to increase awareness of a sustainable

global economy at company level. Equity securities issued by companies violating such principles and not addressing such violations adequately will not be included in the Fund's portfolio. Other criteria may, as necessary, apply in developing "socially responsible" screens.

Benchmark

The Fund uses the Russell 1000 Growth index as a Comparator Benchmark to compare performance. The Fund is actively managed and is not constrained by any benchmark.

Dealing Frequency

Investors may redeem shares on demand on any day (except Saturday or Sunday) on which the New York Stock Exchange is open.

Distribution Policy

The Fund does not intend to distribute income on your shares. The price of your shares shall rise by the net income earned per share.

For full investment policy details please refer to the Fund Supplement's Investment Objective and Policies section.

Intended Investor

The Fund is suitable for any investor (institutional and, unless prohibited by the rules of a particular jurisdiction, retail) seeking to achieve capital appreciation over the long term (i.e., greater than five (5) years). As the Fund invests primarily in equities, investors should consider an investment in the Fund as medium to high risk.

Term

This Fund is an umbrella type open-ended UCITS and this product is not subject to any fixed term. For full investment objectives and policy details, please refer to the Investment Objectives and Investment Policy in the Fund's Supplement to the Prospectus, which are available at <https://www.browнадvisory.com/intl/home>. The Fund's assets are held through its Depository, which is Brown Brothers Harriman Trustee Services (Ireland) Limited.

The NAV per share of the Fund will be published daily and made available on the internet at www.browнадvisory.com and will be updated following each calculation of NAV.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 5 out of 7, which is “a medium high” risk class. This rates the potential losses from future performance at a medium high level, and poor market conditions could impact the ability for you to receive a positive return on your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product’s Annual Report or Prospectus available at <https://www.brownadvisory.com/intl/ucits-legal-document-library>

This product does not include any protection from future market performance so you could lose some or all of your investment

Performance Scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		
Example Investment:		£10000
		If you exit after 0 year
Scenarios		
Minimum	There is no minimum guaranteed return if you exit before years. You could lose some or all of your investment.	
Stress	What you might get back after costs	N/A
	Average return each year	N/A
Unfavourable	What you might get back after costs	N/A
	Average return each year	N/A
Moderate	What you might get back after costs	N/A
	Average return each year	N/A
Favourable	What you might get back after costs	N/A
	Average return each year	N/A

What happens if Brown Advisory is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

	If you exit after 0 year
Total costs	
Cost impact	

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed that the product performs as shown in the moderate scenario and GBP 10 000 is invested.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be #^BEFORECOSTS^# % before costs and #^AFTERCOSTS^# % after costs.

Composition of costs

One-off costs upon entry or exit		
Entry costs	Not Applicable	N/A
Exit costs	1% - This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	N/A
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The ongoing charges figure is based on expenses for the year ending 31 October 2022. The figure may vary from year to year. It excludes portfolio transaction costs.	N/A
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	N/A
Incidental costs taken under specific conditions		
Performance fees	Not Applicable	N/A

How long should I hold it and can I take money out early?

Recommended holding period: 5 years. The fund has daily liquidity. The recommended holding period of the fund assumes the fund being the sole or majority holding of the investor. The recommended holding period is primarily based on the historic volatility of the underlying investments and is not directly applicable if used in a portfolio based on the investor's risk profile. The fund is not intended for short term speculation purposes.

How can I complain?

As a Shareholder in the Fund, you are entitled to make a complaint free of charge. Any such complaint must be handled by the management company promptly and effectively.

You also have the right to refer the relevant complaint to the Financial Services and Pensions Ombudsman after following the Fund's complaints process if you are still not satisfied with the response received.

Further information on the complaints policy relating to the Fund is available from LondonInstitutionalOperations@Brownadvisory.com.

Other relevant information

Please see offering documentation for further information. The cost, performance and risk calculations included in this KID follow the methodology prescribed by EU regulation. Past performance for the previous 10 years and historical performance scenarios are available at:

Key Information Document for iClima Global Decarbonisation Enablers UCITS ETF (the **Fund**), a sub-fund of HANetf ICAV Class - Accumulating

Purpose

This document provides you with key information about this investment Fund. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this Fund and to help you compare it with other Funds.

Product	iClima Global Decarbonisation Enablers UCITS ETF
 PRIIP Manufacturer	HANetf Management Limited
ISIN	IE00BNC1F287
Website	www.hanetf.com
Contacting the manufacturer	Email: info@hanetf.com Tel +44 (0)203 794 1800
Competent authority	Central Bank of Ireland (the Central Bank) is responsible for supervising HANetf Management Limited in relation to this Key Information Document
Management Company	HANetf Management Limited is authorised in Ireland and regulated by the Central Bank.
KID Production Date	31 December 2022

What is this Fund?

Type	<p>The Fund is a sub-fund of HANetf ICAV (the ICAV), an open-ended Irish collective asset-management vehicle umbrella fund with segregated liability between sub-funds, with variable capital established under the laws of Ireland and authorised by the Central Bank under the UCITS Regulation 2011, as amended.</p>
Objectives and Policies	<p>The Fund seeks to track the price and yield performance, before fees and expenses, of the iClima Global Decarbonisation Enablers Index USD (the Index). The Index is governed by a published, rules-based methodology and has the objective of sustainable Investment. The Index is designed to measure the performance of a global investable universe of publicly listed companies involved in the enablement of CO2 avoidance. The Index weights companies in the Index by market capitalisation. Up to 5 tiers may occur and companies are equally weighted within each tier. The top 25 companies in the Index are each given a higher allocation of between 1% to 1.4%. If the Index has less than 100 constituents, then all companies shall be equally weighted. The Index also screens out companies based on some environmental, social and governance (ESG) criteria. To be eligible for inclusion in the Index, companies must meet the following criteria as set out in the supplement to the prospectus for the Fund (the Supplement):</p> <ul style="list-style-type: none"> operate in the following five sectors that enable CO2 avoidance: green energy; green transportation; water and waste improvements; decarbonisation enabling solutions; and sustainable products (the Sectors); form a component of the Solactive Global Benchmark Series index universe; enable at least one of 4 sources of CO2 avoidance as defined by iClima Earth Ltd (the Index Sponsor): direct reduction of greenhouse gas emissions from fossil fuel energy generation or burning; enabling avoidance via renewable energy generation; enabling of energy savings; or carbon sequestration; not be excluded based on the negative ESG screening and violations of UN Global Compact principles criteria as set out in the Supplement; meet the minimum market capitalisation and liquidity requirements; meet the green revenue test; and be listed on one of the eligible exchanges described in the Supplement. <p>The Index is reconstituted and rebalanced on a semi-annual basis.</p> <p>The Fund employs a "passive management" (or indexing) investment approach and will seek to employ a replication methodology, meaning insofar as possible and practicable, it will invest in all of the securities comprising the Index.</p>
Depositary	The Bank of New York Mellon SA/NV, Dublin Branch (the Depositary)
Additional Information	<p>Shares of the Fund are listed on one or more stock exchanges. Typically, only authorised participants (i.e., brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell shares on exchange on each day the relevant stock exchange is open.</p> <p>Income received by the Fund's investments will not be distributed in respect of the shares of this class. Instead, it will be accumulated and reinvested on behalf of the shareholders of the Fund.</p> <p>Further information such as fund prospectus, latest annual report and latest NAV can be obtained free of charge under www.hanetf.com</p>
Term	The fund has no minimum fixed term, although the recommended holding period is 5 years. Termination of the Fund is only possible in those cases expressly provided for in the Prospectus or Supplement of the Fund.
Intended retail investor	The Fund is intended to be offered to retail investors who are seeking capital growth over the long term. An investment should only be made by those persons who are able to sustain a loss on their investment. Typical investors in the Fund are expected to be investors who want to take exposure to the markets covered by the Fund's investment policy and are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

What are the risks and what could I get in return?

Summary Risk Indicator

The risk indicator assumes you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other Funds. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 5 out of 7, which is a high-risk class.

This classification takes into consideration two elements:

1) the market risk - that rates the potential losses from future performance at a high level; and 2) the credit risk which estimates that poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund. This risk is not considered in the indicator shown above.

The Fund does not include any protection from future market performance so you could lose some or all of your investment. Investment by the Fund in other collective investment schemes, emerging markets and use of derivatives may involve additional risks. Please refer to the "Risk Factors" sections of the Prospectus and the Fund's Supplement which are available at www.hanetf.com.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the next 5 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period		5 years		
Scenarios		If you exit after 1 year	If you exit after 3 years	If you exit after 5 years (RHP)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment			
Stress scenario	What you might get back after costs	1,577 USD	3,829 USD	2,765 USD
	Average return	-84.2%	-27.4%	-22.7%
Unfavourable scenario	What you might get back after costs	8,227 USD	7,820 USD	7,901 USD
	Average return	-17.7%	-7.9%	-4.6%
Moderate scenario	What you might get back after costs	10,774 USD	12,452 USD	14,391 USD
	Average return	7.7%	7.6%	7.6%
Favourable scenario	What you might get back after costs	14,008 USD	19,685 USD	26,025 USD
	Average return	40.1%	25.3%	21.1%

The figures shown include all the costs of the Fund itself but may not include all the costs that you pay to your advisor or distributor/and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Due to market risk exposure, you can lose some or all of the amount invested during the recommended holding period of 5 years.

- **The stress scenario** shows what you might get back in extreme market circumstances.
- **Unfavourable scenario:** This type of scenario occurred for an investment between 2017 and 2022.
- **Moderate scenario:** This type of scenario occurred for an investment between 2017 and 2022.
- **Favourable Scenario:** This type of scenario occurred for an investment between 2017 and 2022.

What happens if the HANetf Management Limited is unable to pay out?

HANetf Management Limited, as PRIIPS manufacturer of the Fund, is not obliged to make any payment in relation to the Fund, such obligations being those of the Fund itself. The assets of the Fund are kept separately from those of the Manager. An insolvency or default of the Manager should not result in the Fund suffering any financial loss in relation to its assets. The amount the Fund is obliged to pay out is linked to the net assets of the Fund so it is unlikely that the Fund will be unable to pay out unless there is an operational error or an insolvency or default by the Depositary which holds the Fund's assets on its behalf. In the event of the insolvency or default of the Depositary, securities held by the depositary on behalf of the Fund should be protected but the Fund may suffer loss in relation to cash and certain other assets which are not protected. Investment in the Fund is not covered by any investor protection scheme."

What are the Costs?

The party advising on or selling you this Fund may charge you other costs. If so, this party will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover one-off, ongoing and incidental costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund performs]. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- For the other holding periods we have assumed the Fund performs as shown in the moderate scenario.
- USD 10,000 is invested.

Investment USD 10,000

Scenarios	If you exit after 1 year	If you exit after 3 years	If you exit after 5 years
Total costs	70.49 USD	246.00 USD	476.97 USD
Annual cost impact	0.65%	0.65%	0.65%

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0% of the amount you pay in when entering this investment	USD
Exit costs	0% of your investment before it is paid out to you	USD
Ongoing costs		
Management fees and other administrative or operating costs	0.65% of the value of your investment per year". This is an estimate based on actual costs over the last year.	USD
Transaction costs	0.14% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Fund.	Nil

How long should I hold the Fund and can I take my money out early?

The Fund has no required minimum holding period but is designed for longer-term investment, though it is recommended that you stay invested for at least 5 years. Investors are able to sell their investment on any day on which banks are open in the UK. When you cash in or if you switch between sub-funds, there may be a delay of up to 5 days for this Fund. By selling the Fund earlier than the recommended holding period, you may receive back less than you would have received if you had stayed invested until maturity. A redemption or exchange fee of up to 3% may be payable to the Manager in such circumstances, as well as any fees that may be charged by your broker.

You can make regular and one-off withdrawals. Withdrawals could be greater than any growth achieved and could reduce your investment's value below the amount invested. You should refer to the Prospectus and Supplement for this Fund for the conditions that apply and information on tax.

How can I complain?

In the event you should wish to complain at any time about this Fund, or the service you have received, please contact the marketing agent, HANetf Limited.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

iShares MSCI USA SRI UCITS ETF (the "Fund"), **USD Accu** (the "Share Class"), ISIN: **IE00BYVJRR92**, is authorised in Ireland and manufactured by BlackRock Asset Management Ireland Limited (the "Manager") which is part of the BlackRock, Inc group.

The Manager is authorised in Ireland and regulated by the Central Bank of Ireland (the "CBI") and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

More information is available at www.blackrock.com or by calling **+353 1 612 3394**. This document is dated 01 January 2023.

What is this product?

Type: The Fund is a sub-fund of iShares IV plc, an umbrella company incorporated in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities ("UCITS").

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

Objectives

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's investments, which reflect the return of the MSCI USA SRI Select Reduced Fossil Fuel Index, (the Index).
- The Fund, is passively managed and aims to invest in equity securities (e.g. shares) that make up the Index.
- The Index measures the performance of a sub-set of equity securities (e.g. shares) issued by US companies within the MSCI USA Index (Parent Index) with higher environmental, social and governance (ESG) ratings than other sector peers within the Parent Index, based on a series of exclusionary and ratings based criteria. Companies are excluded from the Index if they are identified as being involved in certain business lines/activities, as outlined in the Fund's Prospectus. The Fund will take into account such ESG criteria only when selecting the securities to be held directly by the Fund. The Fund may obtain indirect exposure (through, including but not limited to, financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes) to securities considered not to satisfy these ESG criteria.
- Eligible constituents within each Global Industry Classification Standard ("GICS") sector are ranked by the index provider and are weighted based on their free float adjusted market capitalisation as further disclosed in the Prospectus.
- The Index targets 5% issuer exposure capping. In order to reduce the risk of non-compliance with the 5% threshold due to market movements, the weight of each issuer is capped at 4.5% at the point of Index construction and at each rebalancing.
- The Fund's investment in the equity securities that make up the Index will, at the time of purchase, comply with the ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it.
- The investment manager may use FDIs to help achieve the Fund's investment objective. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments which in turn may affect the value of your investment.
- The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below).
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?").
- The depositary of the Fund is State Street Custodial Services (Ireland) Limited.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the iShares IV plc. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the iShares website at: www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser.
- Your shares will be accumulating shares (i.e. income will be included in their value).
- Your shares will be denominated in US Dollar, the Fund's base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

Intended retail investor: The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see "How long should I hold it and can I take my money out early?").

Insurance benefits: The Fund does not offer any insurance benefits.

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 4 out of 7, which is a medium risk class. This classification rates the potential losses from future performance at a medium level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- **Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus or AIFMD Disclosure for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

Recommended holding period : 5 years		Example Investment : USD 10,000	
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress*	What you might get back after costs	5,990 USD	3,580 USD
	Average return each year	-40.1%	-18.6%
Unfavourable**	What you might get back after costs	9,230 USD	11,590 USD
	Average return each year	-7.7%	3.0%
Moderate**	What you might get back after costs	11,740 USD	18,960 USD
	Average return each year	17.4%	13.6%
Favourable**	What you might get back after costs	16,070 USD	26,610 USD
	Average return each year	60.7%	21.6%

* The stress scenario shows what you might get back in extreme market circumstances.

** This type of scenario occurred for an investment in the product with input from benchmark(s) / proxy during 2012-2016

What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, State Street Custodial Services (Ireland) Limited (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

What are the costs?

Costs over time: The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

Scenarios	If you exit after 1 year	If you exit after 5 years
Total costs	20 USD	194 USD
Annual cost Impact (*)	0.2%	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.9 % before costs and 13.6 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit	If you exit after 1 year
Entry costs	Not applicable to secondary market investors. Investors dealing via stock exchanges will pay fees charged by stock brokers. Such charges can be obtained on exchanges where the shares are listed and traded, or from stock brokers. Authorised participants dealing directly with the Fund or the Management Company will pay related transaction costs.
Exit costs	Not applicable to secondary market investors. Investors dealing via stock exchanges will pay fees charged by stock brokers. Such charges can be obtained on exchanges where the shares are listed and traded, or from stock brokers. Authorised participants dealing directly with the Fund or the Management Company will pay related transaction costs.

Ongoing costs taken each year

Management fees and other administrative or operating costs	0.2% of the value of your investment per year. This is based on a combination of estimated and actual costs data over the last year. Any underlying product costs are included here with the exception of transaction costs which would be included below under 'Transaction costs'.	20 USD
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0 USD

Incidental costs taken under specific conditions

Performance fees	There is no performance fee for this product.	-
------------------	---	---

How long should I hold it and can I take money out early? Recommended Holding Period: 5 years

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Fund and the time frame in which it is expected that it will be possible to achieve the investment objective of the Fund. Any investment should be considered against your specific investment needs and appetite for risk. BlackRock has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Fund to your needs you should seek appropriate professional advice. Details of dealing frequency can be found under "What is this product?". You may receive less than expected if you cash in earlier than the RHP. The RHP is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. Please see the "What are the costs?" section for details of any exit fees.

How can I complain?

If you are not entirely satisfied with any aspect of the service you have received and you wish to complain, details of our complaints handling process are available at www.blackrock.com/uk/individual/about-blackrock/contact-us. Additionally, you can also write to the Investor Services Team, at BlackRock's UK Registered Office, 12 Throgmorton Avenue, London, EC2N 2DL or e-mail them at enquiry@ukclientservices.blackrock.com.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of Fund: **L&G Clean Water UCITS ETF**

Share class name: **USD Accumulating ETF**

Manufacturer name: LGIM Managers (Europe) Limited, part of the Legal & General Group

Share class ISIN: IE00BK5BC891

This PRIIP is authorised in Ireland

Website: <https://www.fundcentres.lgim.com/>

Telephone: +44 (0) 203 124 3277

Regulator: Central Bank of Ireland

Production date: 2022-12-30

What is this product?

Type: This investment fund is a sub-Fund of Legal & General UCITS ETF Plc (the "Company"), an umbrella investment company with variable capital and segregated liability between Funds. The Fund is authorised in Ireland and regulated by the Central Bank of Ireland.

Term: There is no fixed maturity date.

Objectives: The Fund is a passively managed exchange traded Fund that aims to track the performance of the Solactive Clean Water Index NTR (the "Index"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund. The Fund has a sustainable investment objective as it invests in companies which (i) contribute to environmental objectives, (ii) do not significantly harm any environmental or social objectives, and (iii) follow good governance practices. Shares in this Share Class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.lgim.com>. The index is comprised of companies which are publically traded on various stock exchanges around the world that have expertise in providing certain services in areas such as, but not limited to, "technology", "digital", "utility", and/or "engineering" for the global clean water industry (the "Water Related Services") and derive a certain proportion of revenues from the provision of Water Related Services. The Index will exclude companies which are constituents of the ESG Exclusions Index, namely companies that (i) have severe controversies, (ii) are persistent violators of the UN Global Compact, and/or (iii) are involved, to a certain degree, in harmful activities as determined in the Index Methodology available at <https://www.solactive.com/Indices/?index=DE000SLA6Z81>. The Fund will primarily invest directly in the securities represented in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) companies that are not constituents of the Index that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments (i.e. investments the prices of which are based on the companies contained in the Index and/or such other companies). Adjustments to the Fund's portfolio, including as a result of a reconstitution of the Index, will incur transaction costs. This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be reinvested into the Fund.

Intended retail investor: The Fund is designed for investors looking to grow their money in an investment which can form part of their existing savings portfolio. Although investors can take their money out at any time, the Fund may not be appropriate for those who plan to withdraw their money within five years. The Fund is not designed for investors who cannot afford more than a minimal loss of their investment.

What is the risk and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class.

The Fund is subject to the risks associated with technology-focused companies that are particularly vulnerable to rapid developments in technology (which may leave their products out-of-date), government regulation and competition which could negatively affect their value.

The value of the Fund may be affected by risks not in the SRI, including failure of a counterparty, custodian, issuer or index provider and derivative use.

Performance scenarios

Investment USD 10,000			
Scenarios		1 year	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	1,030.0 USD	650.0 USD
	Average return each year	-89.7%	-42.2%
Unfavourable scenario	What you might get back after costs	8,140.0 USD	8,140.0 USD
	Average return each year	-18.6%	-4.0%
Moderate scenario	What you might get back after costs	11,530.0 USD	18,330.0 USD
	Average return each year	15.3%	12.9%
Favourable scenario	What you might get back after costs	16,590.0 USD	25,320.0 USD
	Average return each year	65.9%	20.4%

Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.

Unfavourable scenario: 2021-06-30 to 2022-06-30

Moderate scenario: 2012-09-30 to 2017-09-30

Favourable scenario: 2016-02-29 to 2021-02-28

This table shows the money you could get back over the next 5 year(s), under different scenarios, assuming that you invest 10,000.00 USD.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

What happens if LGIM Managers (Europe) Limited is unable to pay out?

If LGIM Managers (Europe) Limited defaults, investors in the Fund would not face any financial losses. However, the value of an investment and any income taken from it is not guaranteed and can go down as well as up, you may not get back the amount you originally invested. The fund is not covered by an investor compensation scheme.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the holding period(s). They include potential early exit penalties. The figures assume you invest 10,000.00 USD. The figures are estimates and may change in the future.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000/1,000 per year is invested.

Investment USD 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	61.00 USD	570.00 USD
Impact on return (RIY) per year	0.61%	0.69%

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.00% There is no entry fee for this product.	0.00 USD
Exit costs	0.00% There is no exit fee for this product.	0.00 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.49% of the value of your investment per year.	49.00 USD
Transaction costs	0.12% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	12.10 USD
Incidental costs taken under specific conditions		
Performance fees and carried interest	0.00% There is no performance fee for this product.	0.00 USD

How long should I hold it and can I take my money out early?

An investor can hold their investment for any time period but 5 year(s) is recommended.

The recommended holding period of 5 years has been selected for illustrative purposes only. Equity investments should be seen as long-term investments however there is no minimum (or maximum) holding period for the Shares. The Shares can be sold by ordinary investors using an intermediary (e.g. a stockbroker) when the markets on which they trade are open. An intermediary is likely to apply a commission to purchases and sales.

The above mentioned period has been defined in accordance to the product characteristics.

How can I complain?

Complaints can be made in writing to complaints@lgim.com or to LGIM Managers (Europe) Ltd, 70 Sir John Rogerson's Quay, Dublin 2, DO2 R296, Ireland.

Other relevant information

Further information about the Fund including previous performance scenarios required under PRIIPs regulation can be found at www.lgim.com. There is insufficient data to provide a useful indication of past performance. The Fund's Prospectus and the annual and semi-annual reports can also be found there in English and certain other languages. This Key Investor Document is updated at least every 12 months. If you are in any doubt about the action you should take, you should seek independent financial advice.

LIONTRUST

SUSTAINABLE FUTURE GLOBAL GROWTH FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Global Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Acc class (ISIN: GB0030030067). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more) through investment in sustainable securities.

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The investment objective of the Fund will be achieved through investment in securities that provide or produce sustainable products and services as well as having a progressive approach to the management of environmental, social and governance ("ESG") issues.
- The Fund will typically invest 95% (minimum 90%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- Investments in emerging market securities will be limited to 20%.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
 - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
 - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily for its exposure to Global equities.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature

of the underlying holdings.

- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	0.86%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 19 February 2001.
- The 2 Acc share class launch date is 19 February 2001.
- The base currency of the Fund is pounds sterling.

Practical information

Authorisation	This Fund is authorised in the UK and regulated by the Financial Conduct Authority.
Depository	Bank of New York Mellon (International) Ltd.
Investment Adviser	Liontrust Investment Partners LLP.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily for its exposure to UK equities.
- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature

of the underlying holdings.

- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Key Investor Information

Montanaro Better World Fund (the "Fund")

Share Class: Sterling Distribution Class (ISIN IE00BYWFFF02), a Sub-Fund of Montanaro Smaller Companies plc (the "Company"). The Fund is managed by KBA Consulting Management Limited (the "Manager").

Objectives and Investment Policy

Investment Objective

To deliver long-term capital growth.

Sustainability Objective

Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

Investment Policy

The Fund will invest in global Small and MidCap companies with a market capitalisation smaller than the largest unadjusted market capitalisation of any of the constituents of the MSCI World SMID Cap (Total Return) Index at the time of initial investment. The securities in which the Fund invests will be listed or traded on Recognised Markets.

The Fund will seek to invest in high quality companies whose products, services or behaviour are deemed to make a positive impact on society and which emphasise sound environmental, social and governance (ESG) practices. In particular, the Investment Manager will seek to identify profitable and well managed businesses operating in markets that offer attractive structural growth opportunities.

The Fund may not invest in companies with material revenue exposure to the manufacturing or supply of weapons, tobacco, gambling, pornography, alcohol, or any other areas deemed not to meet the Investment Manager's ethical standards.

The Fund is actively managed and does not track the MSCI World SMID Cap (Total Return) Index (the "Benchmark"). The Benchmark is used for comparison purposes only. The Fund may invest in securities not included in the Benchmark. The Fund is monitored, but is not constrained, in reference to the Benchmark.

Income

If sufficient net income is available, dividends will be paid annually. You may choose for your dividends to be reinvested.

Fund Currency

The base currency of the Fund is Euro.

Investment Horizon

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Dealing Frequency

You may redeem your shares, or invest in the Fund, before 12 noon (Dublin time) on any business day except Irish or UK bank holidays.

Risk and Reward Profile

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. However, the lowest category (1) does not mean a risk free investment.

The risk category is calculated using (simulated) historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

Why is this Fund in this category?

The Fund invests in securities which are subject to market fluctuations. The Fund's investments are in multiple regions and may be sensitive to localised economic, market, political or regulatory events.

Additional Risks

Liquidity / Market Capitalisation Risk

Small and MidCap companies may be less liquid than the shares of larger companies and can be more sensitive to economic and other factors. As a result, the Fund may experience greater volatility both in the value of its investments and in its net asset value per share.

Counterparty / Operation Risk

A counterparty may fail to pay the proceeds related to the sale of securities by the Fund, or may fail to deliver securities purchased by the Fund. Failures or delays in operational processes may negatively affect the Fund.

Exchange Rate Risk

The Fund invests in quoted companies which may have share prices denominated in currencies other than the Euro and may therefore be exposed to exchange rate risks. In addition, holders of a share class in a currency that is different from the base currency of the Fund will be exposed to the exchange rate risk between the two currencies since there is no currency hedging. Different share classes may receive different investment returns.

Market Risk

The value of investments and, consequently, the price of shares can go down as well as up and an investor may not get back the amount originally invested.

Tax Risk

Any change in the Fund's tax status or in taxation legislation could affect the value of the investments held by the Fund.

For a more detailed explanation of these and other risks please refer to the "Risk Factors" section of the prospectus and supplement for the Fund.

Charges

The charges you pay are used to pay the cost of running the Fund including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.94%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The Fund does not charge entry or exit charges.

The ongoing charge figure shown here is based on expenses for the year ending 31 December 2021. The UCITS annual report for each financial year will include details on the exact charges made.

This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry / exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Investments in the Fund may be sold to meet ongoing charges and the value of your investment in the Fund would reduce. For more information about charges, please see the Fund's prospectus which is available at www.montanaro.co.uk.

Past Performance

Past performance is not a reliable indicator of future results. The past performance shown here includes ongoing charges. Entry / exit fees are excluded. Past performance has been calculated in GBP and is expressed as a percentage change of the Fund's net asset value at each year-end. The share class was launched in April 2018.

Practical Information

Depository

The Bank of New York Mellon SA/NV, Dublin Branch

Administrator

BNY Mellon Fund Services (Ireland) DAC

Further Information

More detailed information on this Fund (such as the prospectus, the relevant supplement, and the latest annual and semi-annual report) is available in English free of charge from the Investment Manager, the Administrator, the Fund's distributors or online at www.montanaro.co.uk.

More share classes are available for this Fund. For more details about other share classes, please refer to the prospectus which is available at www.montanaro.co.uk.

The Fund sits within an umbrella structure comprising a number of different sub-funds, one of which is the Fund.

This Key Investor Information Document (KIID) is specific to the Fund and share class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the entire umbrella. KIID documents are available for all other sub-funds of the Company along with the prospectus and annual report at www.montanaro.co.uk.

You may exchange your shares free of charge for shares of another share class or sub-fund of the Company. Please refer to the prospectus for further details.

The Fund's assets are held separately from those of the other sub-funds. The assets and liabilities of each sub-fund are segregated by law, therefore the assets of this Fund belong exclusively to it and are not available to meet the liabilities of any other sub-fund.

Details of the remuneration policy of the Manager is available at www.kbassociates.ie and a paper copy will be made available free of charge upon request.

Net Asset Value (NAV) Publication

The net asset value per share is available on Bloomberg and at the registered office of the Company.

Tax Legislation

The Fund is subject to the tax laws and regulations of Ireland. Depending on your own country of residence, this might have an impact on your investments. For further details, you should consult a tax advisor.

Liability Statement

The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Company.

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Japan High Conviction Fund (the 'sub-fund')

a sub-fund of Nomura Funds Ireland plc

Class A JPY (IE00BBT38139)

This product is manufactured by Nomura Asset Management U.K. Ltd, a member of the Nomura Group which is supervised by the FCA. For more information on this product, please refer to www.nomura-asset.co.uk or call +44 (0) 20 7521-3333. This product is authorised by the Central Bank of Ireland. This product is managed by Bridge Fund Management Ltd, a UCITS management company authorised by the Central Bank of Ireland. The depositary of the fund is Brown Brothers Harriman Trustee Services (Ireland) Limited.

This document was published on 01/01/2023.

What is this product?

Type

This is an Irish UCITS variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland.

Term

This product has no fixed term. The product may be liquidated under limited circumstances as detailed in the prospectus.

Objectives

Any income the Fund generates will be accumulated and reinvested on behalf of investors.

The fund aims to achieve capital growth by investing primarily in shares of a limited number of companies of all sizes traded or listed in Japan.

The fund shall invest primarily in equity and equity-related securities in Japan. The fund may invest 20% of the value of the fund in non-Japanese companies that have business activities in Japan. Due to the highly concentrated nature of the portfolio, the fund is likely to have a higher annualised volatility than a more diversified portfolio.

The fund is considered to be actively managed in reference to the index (Topix Index) by virtue of the fact that it uses the index for performance comparison purposes. However, the index is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the index.

Intended retail investor

The fund is intended for retail and institutional investors. The fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The fund is suitable for investors seeking long term capital appreciation and who are prepared to accept a moderate level of volatility.

For full investment objectives and policy details please refer to the prospectus.

Other Information

Investors may switch their investment into shares of other funds upon request and further details can be found in the prospectus. Investors may redeem their investment on each business day of the fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator (SRI) assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of Nomura Asset Management U.K. Ltd to pay you.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. Currency hedged share classes aim to deliver a return that is as close as possible to the base currency performance of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, these techniques may not be fully effective in completely removing the exchange rate risk.

You can find more information about the risks of the fund in the prospectus at: www.nomura-asset.co.uk/fund-documents/

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10000 JPY	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	2150 JPY	1820 JPY
	Average return each year	-78.53%	-28.85%
Unfavourable	What you might get back after costs	7100 JPY	3550 JPY
	Average return each year	-29.01%	-18.73%
Moderate	What you might get back after costs	10810 JPY	15580 JPY
	Average return each year	8.09%	9.28%
Favourable	What you might get back after costs	17940 JPY	24790 JPY
	Average return each year	79.42%	19.91%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest JPY 10 000,00.

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable Scenario This type of scenario occurred for an investment between 2021 and 2022.

Moderate Scenario This type of scenario occurred for an investment between 2013 and 2018.

Favourable Scenario This type of scenario occurred for an investment between 2016 and 2021.

What happens if Nomura Asset Management U.K. Ltd is unable to pay out?

You may lose some or all of your investment due to the default of the fund and/or the UCITS (as defined above). The fund is not a guaranteed fund and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. You are not covered by the Irish compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that in the first year you would get back the amount that you invested (0 % annual return), for the other holding period that the product performs as shown in the moderate scenario. and that your JPY 10 000,00 has been invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	66695 JPY	164337 JPY
Annual cost impact (*)	6.8%	2.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 12,0 % before costs and 9,1 % after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.	Up to 50000 JPY
Exit costs	The impact of the costs when exiting your investment.	0 JPY
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments.	16111 JPY
Transaction costs	This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and we sell.	1486 JPY
Incidental costs taken under specific conditions		
Performance fees	No Performance Fees are applied.	0 JPY

How long should I hold it and can I take money out early?

The recommended holding period for this fund is 5 years. However, you can redeem your investment at any time in accordance with the fund's prospectus.

How can I complain?

If you have a complaint about the product or the person advising or selling the product to you, you will need to provide the details to the person who advised you or sold you the product. Other complaints about the investment product or the Key Information Document should be sent to the Client Service Team, Nomura Asset Management U.K. Ltd, 1 Angel Lane, London, United Kingdom EC4R 3AB, or emailed to info@nomura-asset.co.uk. You can also visit www.nomura-asset.co.uk for more information.

PRODUCT

Pictet - Nutrition - I dy GBP

ISIN: LU0448837160

Manufacturer

Pictet Asset Management (Europe) S.A., a wholly owned company of the Pictet group.

Call +352 467 171-1 for more information.

assetmanagement.pictet

Competent Authority

The Fund is authorized in Luxembourg, supervised by the Commission de Surveillance du Secteur Financier ("CSSF") and managed by Pictet Asset Management (Europe) S.A. ("the Management Company"). The Management Company is authorized in Luxembourg and regulated by the CSSF.

Revision of the KID

The date of production of this KID is 01-01-2023.

WHAT IS THIS PRODUCT?

Type

Pictet - Nutrition is a Compartment of an open-ended investment company with variable capital (SICAV) with segregated liability between Compartments and is authorised as a Undertaking for Collective Investment Transferable Securities ("UCITS") in Luxembourg.

Term

This product has no maturity date.

The Compartment is formed for an indefinite period. However, the Board of Directors may in certain cases decide to close the Compartment or at any time propose to close the Compartment at an extraordinary general Shareholders' meeting.

Objectives

OBJECTIVE

To increase the value of your investment while seeking to achieve a positive environmental and social impact.

REFERENCE INDEX

MSCI AC World (EUR), an index that does not take into account environmental, social and governance (ESG) factors. Used for risk monitoring, performance objective and performance measurement.

PORTFOLIO ASSETS

The Compartment mainly invests in equities of companies operating in the nutrition related sectors, especially those improving quality, access to, and sustainability of food production. The Compartment may invest worldwide, including in emerging markets and Mainland China.

DERIVATIVES AND STRUCTURED PRODUCTS

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

COMPARTMENT CURRENCY

EUR

INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market and fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The investment manager considers ESG factors a core element of its strategy by seeking to invest mainly in economic activities that contribute to an environmental and social objective whilst avoiding activities that adversely affect society or the environment. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 9. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Intended retail investor

Suitable for investors with all levels of knowledge and/or experience, seeking capital growth and who have a 5 years or more investment horizon. The product does not have any capital guarantee and up to 100% of their capital is at risk. A specific environmental, social and corporate governance strategy (ESG) is followed for this product.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for 5 year(s).
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. Your local currency may be different from the currency of the product. You may receive payments in a currency that is not your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product may be exposed to further risks that are not included in the Summary Risk Indicator. Further information can be found in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Pictet Asset Management (Europe) S.A. are not able to pay you what is owed, you could lose your entire investment.

However, you may benefit from a consumer protection scheme. The indicator shown above does not consider this protection.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period: 5 years

Investment = GBP 10,000

Scenarios

		IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
Stress scenario	What you might get back after costs	GBP 3,910	GBP 3,760
	Average return each year %	-60.90%	-17.77%
Unfavourable scenario	What you might get back after costs	GBP 8,610	GBP 8,260
	Average return each year %	-13.90%	-3.75%
Moderate scenario	What you might get back after costs	GBP 10,810	GBP 15,220
	Average return each year %	8.10%	8.76%
Favourable scenario	What you might get back after costs	GBP 13,910	GBP 18,700
	Average return each year %	39.10%	13.34%

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2022.

Moderate scenario: This type of scenario occurred for an investment between 2014 and 2019.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

WHAT HAPPENS IF PICTET ASSET MANAGEMENT (EUROPE) S.A. IS UNABLE TO PAY OUT?

Pictet Asset Management (Europe) S.A. is a société anonyme and has been appointed as management company of the Fund. The Fund is also a société anonyme and its assets are segregated from those of the Management Company. The Fund has entrusted the Depositary Bank with the safekeeping of the its assets, which are kept separated from the Depositary Bank's assets. A default of Pictet Asset Management (Europe) S.A. will therefore have no impact on the value of your investment in the product.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

– In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

– GBP 10,000 is invested.

Investment GBP 10,000

Scenarios	IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
-----------	--------------------------	---------------------------

Total costs	GBP 120	GBP 859
Annual cost impact (*)	1.20%	1.20%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.96% before costs and 8.76% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures do not include any distribution fees, however the person selling you the product may charge you and they will inform you of the actual distribution fee.

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

ONE-OFF COSTS UPON ENTRY OR EXIT		IF YOU EXIT AFTER 1 YEAR
Entry costs	Pictet Asset Management (Europe) S.A. do not charge an entry fee, however the person selling you the product may charge you up to a maximum of 5%.	GBP 0
Exit costs	Pictet Asset Management (Europe) S.A. do not charge an exit fee for this product, but the person selling you the product may charge you no more than 1%.	GBP 0
ONGOING COSTS TAKEN EACH YEAR		
Management fees and other administrative or operating costs	1.11% taken from this Share Class over a year.	GBP 111
Transaction costs	0.091% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	GBP 9
INCIDENTAL COSTS TAKEN UNDER SPECIFIC CONDITIONS		
Performance fees and/or Carried interests	There is no performance fee for this product. There is no carried interest	-

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 5 years.

We have selected this Recommended holding period considering the volatility of the asset class.

You can disinvest without penalty at any time according to fund prospectus. Refer to the "What are the costs?" section for the impact of the costs on your investment return when you exit.

HOW CAN I COMPLAIN?

Any complaint regarding the conduct of the persons advising on, or selling, the product can be submitted directly to these persons or their supervisors. Any complaint regarding the product or the conduct of the manufacturer of this product can be addressed in writing to the following address: Pictet Asset Management (Europe) S.A., 15, avenue J.F. Kennedy, L-1855 Luxembourg, or by email to: "PAM_Complaint@pictet.com or by following the complaint resolution procedure available in the "Resources" section at the bottom of the page of the following website: <https://assetmanagement.pictet>

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

- Alcohol manufacturing
- Human rights abuses
- Poor employment practices
- Animal welfare violations
- Pornography
- Gambling
- Carbon-intensive industries
- Alcohol retail
- Nuclear power
- Polluting the environment
- Armaments
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 30 September 2021.

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.66% (Acc units); 0.66% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: Price performance based upon bid to bid prior to 21 January 2019 and single price (mid) thereafter.

Past performance is reported on a full calendar year basis.

Fund inception: 14 May 2002. I-class units were launched 1 March 2012.

Past performance should not be seen as an indication of future performance.

Practical information

Trustee: NatWest Trustee and Depositary Services

A member of the Rathbones Group. Registered No. 2376568

Publication date: This Key Investor Information Document is accurate as at 15 February 2022.

This fund and Rathbone Unit Trust Management Limited are authorised and regulated by the Financial Conduct Authority (FCA).

Purpose: This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product: Open-ended Fund

RobecoSAM Smart Materials Equities G GBP (LU2145464694)

<https://www.robeco.com/> Call +3110 224 1224 for more information. Robeco Institutional Asset Management B.V. is authorised in the Netherlands and regulated by the Autoriteit Financiële Markten. Release Date: 01/01/2023 PRIIPs Producer: Robeco Institutional Asset Management B.V.

What is this product?

Type: This fund is a subfund of Robeco Capital Growth Funds, SICAV.

Objective: RobecoSAM Smart Materials Equities is an actively managed fund that invests globally in companies that provide innovative materials and process technologies. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also aims to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund fosters solutions to reduce resource intensity in the economy by investing in more efficient, scalable materials that have lower emissions over the lifetime, mainly investing in companies that advance the UN Sustainable Development Goals (SDGs): Decent Work and Economic Growth, Industry, Innovation and Infrastructure, Sustainable Cities and Communities, and Responsible Consumption and Production and Climate Action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

Benchmark: MSCI World Index TRN

The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the sustainable objective of the fund. The Sub-fund will use a Custom Climate Transition Benchmark to monitor the carbon profile of the Sub-fund. The Custom Climate Transition Benchmark is consistent with the low carbon sustainable investment objective of the Sub-fund. It differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

The fund aims to outperform by taking positions that deviate from the benchmark.

SFDR Article: 9

Currency Risk: The fund is allowed to pursue an active currency policy to generate extra returns and can engage in currency hedging transactions.

Dividend policy: Distributing - Annually

Intended Retail Investor:

This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-Fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Product Term:

This fund does not have a maturity date.

Early termination is not applicable for this fund.

What are the risks & what could I get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level.

Be aware of currency risk. If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown. **You may lose some or all of your investment.** If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

Other relevant risks

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
- The product invests in assets that could become less liquid in distressed (market) conditions, which could have a significant impact on the market price of those assets.

What are the risks & what could I get in return? (continued) Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period	5	
Example investment	GBP 10.000	
	1 Year	5 Years
Stress Scenario	The stress scenario shows what you might get back in extreme market circumstances.	
What you might get back after costs	GBP2010.00	GBP1829.78
Average return each year %	-79.90	-28.80
Unfavourable Scenario	This type of scenario occurred for RobecoSAM Smart Materials Equities G GBP between 2021-08-31 and 2022-11-30.	
What you might get back after costs	GBP8060.00	GBP8988.59
Average return each year %	-19.40	-2.11
Moderate Scenario	This type of scenario occurred for RobecoSAM Smart Materials Equities G GBP between 2014-06-30 and 2019-06-30.	
What you might get back after costs	GBP10770.00	GBP17678.56
Average return each year %	8.00	12.07
Favourable Scenario	This type of scenario occurred for RobecoSAM Smart Materials Equities G GBP between 2016-01-31 and 2021-01-31.	
What you might get back after costs	GBP17160.00	GBP23326.99
Average return each year %	72.00	18.46

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years.

You may lose some or all of your investments.

What happens if Robeco is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE, Luxembourg Branch (the "Depositary"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depositary. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depositary is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested. For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10.000 is invested.

	If you cash in after 1 year	If you cash in after 5 Year
Total cost	GBP104.34	GBP941.69
Annual Cost Impact (*)	1.04%	1.17%

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.24% before costs and 12.07 % after costs.

Composition of Costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different costs categories.

One-off costs upon entry or exit		If you cash in after 1 year
Entry Costs	0.00% Maximum of your investments that you pay to your distributor when entering this investment.	0 GBP
Exit Costs	0.00% of your investments that you pay when redeeming your investment.	0 GBP
Ongoing costs		
Management fees and other administrative or Operating Costs	0.97% of your investment that will be used for the payment of annual charges on your investment levied for managing the investment.	97 GBP
Transaction Costs	0.07% of your investment that will be used for the payment of estimated annual costs incurred when we buy and sell the underlying instruments for the product. The actual amount will vary depending on how much we buy and sell.	7 GBP
Incidental costs taken under specific conditions		
Performance fee	There is no performance fee for this product.	0 GBP

How long should I hold it and can I take money out early?

We have determined the recommended holding period of this product to be 5 years.

The recommended holding period of this product is determined taking into consideration the nature of underlying investment securities and the volatility of thereof. The product can be traded daily and no minimum holding period applies. Exiting before the end of the recommended holding period does not bear any additional risks or costs other than those mentioned in the text above.

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Sustainable Leaders Trust (Accumulation - Class C Shares)

ISIN: GB00B7V23Z99
Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve capital growth over the medium term (3-5 years) by investing at least 80% in the shares of UK companies listed on the London Stock Exchange that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Manager's ethical and sustainable investment policy.

The Fund's performance target is to outperform, after the deduction of charges, the FTSE All-Share Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus. The Fund is actively managed.

Policy At least 80% of the Fund will be invested in shares of UK companies which are listed on the London Stock Exchange. Where the manager believes it is in the best interests of the Fund, they may invest up to 20% of the Fund's assets in shares of overseas companies.

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Manager's ethical and sustainable investment policy please refer to the Prospectus.

Investors can view the current policy at <https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for efficient portfolio management (EPM).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Capital Growth The rise in an investment's value over time.

5-Year Rolling Period Any period of five years, no matter which day you start on.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 6 because its unit price has shown a high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. This Fund has historically been primarily invested in shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category. The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Responsible Investment Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

Charges taken from the fund over a year:

Ongoing charge 0.76%

Charges taken from the fund under specific conditions:

Performance fee None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses as at 31 December 2021. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 29 May 1990 and the share class on 4 December 2012.

The Royal London Sustainable Leaders Trust
(Accumulation - Class C Shares) in GBP

Source: RLAM and DataStream as at 31 December 2021

Past performance is not a guide to future performance and may not be repeated.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Practical information

Trustee: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. Product

Global Energy Transition

a sub-fund of **Schroder International Selection Fund**

Class C Accumulation USD (LU2016063229)

This product is managed by Schroder Investment Management (Europe) S.A, a member of the Schroders Group. For more information on this product, please refer to www.schroders.lu or call +352 341 342 212. Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising Schroder Investment Management (Europe) S.A. in relation to this Key Information Document. Schroder Investment Management (Europe) S.A. is authorised in Luxembourg and regulated by the CSSF.

This document was published on 01/01/2023.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth by investing in equities of companies worldwide that the investment manager believes are associated with the global transition towards lower-carbon sources of energy and which the investment manager deems to be sustainable investments.

The fund is actively managed and invests at least 75% of its assets in sustainable investments, which are investments that contribute towards the global transition towards lower-carbon sources of energy such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies.

The fund will only invest in companies that generate at least 50% of their revenue from activities contributing to the transition, or those which play critical roles in the transition and are increasing their exposure to such activities.

The fund invests at least two-thirds of its assets in a concentrated range of equities of companies worldwide. The fund typically holds fewer than 60 companies. The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the Fund's webpage, accessed via www.schroders.com/en/lu/private-investor/gfc, which includes companies that generate any revenue from fossil fuel and nuclear power.

The fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the investment manager's rating criteria. The fund may invest in companies that the investment manager believes will improve their sustainability practices within a reasonable timeframe, typically up to two years. The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach

to sustainability are available in the prospectus and on the website www.schroders.com/en/lu/private-investor/strategiccapabilities/sustainability/disclosures.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund does not have a target benchmark. The fund's performance should be compared against the MSCI Global Alternative Energy (Net TR) Index and the MSCI AC World (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not have any bearing on how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap to a limited extent with the components of the comparator benchmarks. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmarks. The investment manager will invest in companies or sectors not included in the comparator benchmarks. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Any comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is a medium-high risk class.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

Performance Scenarios

Recommended holding period:		3 years	
Example Investment:		USD 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 2080	USD 2680
	Average return each year	-79.2%	-35.5%
Unfavourable	What you might get back after costs	USD 7630	USD 7970
	Average return each year	-23.7%	-7.3%
Moderate	What you might get back after costs	USD 10690	USD 11250
	Average return each year	6.9%	4.0%
Favourable	What you might get back after costs	USD 22630	USD 27320
	Average return each year	126.3%	39.8%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 2013-11-30 to 2016-11-30

The moderate scenario was simulated based on the appropriate benchmark used for an investment between 2016-04-30 to 2019-04-30

The favourable scenario was simulated based on the appropriate benchmark used for an investment between 2018-10-31 to 2021-10-31

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest USD 10 000,00. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 3 years
Total costs	USD 272	USD 712
Annual cost impact (*)	2.7%	2.2% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6,1 % before costs and 4,0 % after costs.

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of Recommended Holding Period;
- the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	These costs are already included in the price you pay when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge. [1.00%]	Up to USD 100
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	USD 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	These costs are an estimate based on actual costs over the last year that we take each year for managing your investments. [1.04%]	USD 104

How long should I hold it and can I take money out early?

There is no recommended minimum holding period for this fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the fund's prospectus.

How can I complain?

Should you wish to complain about the fund or any aspect of the service provided to you by Schroders, you may contact the Compliance Officer, Schroder Investment Management (Europe) S.A., at 5, rue Höhenhof, L-1736 Senningerberg, Luxembourg or submit your complaint via the contact form on our website, www.schroders.lu or email on EUSIM-Compliance@Schroders.com.

Other relevant information

Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary.

You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly report and the latest price of shares from the fund's management company at 5, rue Höhenhof, L-1736 Senningerberg, Luxembourg, and from www.schroders.lu/kiids. They are available free of charge in English, Flemish, French, German, Italian and Spanish.

Tax legislation: The fund is subject to Luxembourg tax legislation which may have an impact on your personal tax position.

The fund has the objective of sustainable investment (within the meaning of Article 9 SFDR). This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Umbrella Fund: This fund is a sub-fund of an umbrella fund, the name of which is at the top of this document. The prospectus and periodic reports are prepared for the entire umbrella fund. To protect investors, the assets and liabilities of each sub-fund are segregated by law from those of other sub-funds.

This Key Information Document is updated at least every 12 months, unless there are any ad-hoc changes.

The cost, performance and risk calculations included in this Key Information Document follow the methodology prescribed by EU rules.
