

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

iShares Core FTSE 100 UCITS ETF

A sub-fund of iShares plc

GBP (Dist) Share Class

ISIN: IE0005042456

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the FTSE 100 Index, the Fund's benchmark index (Index).
- The Share Class, via the Fund is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- The Index measures the performance of the 100 largest UK companies trading on the London Stock Exchange, which comply with size, liquidity and free float criteria. Companies are included in the Index based on a free float market capitalisation weighted basis. Free float means that only shares available to international investors rather than all of a company's issued shares are used in calculating the Index. Free float market capitalisation is the share price of a company multiplied by the number of shares available to international investors. Securities that are liquid means that they can be easily bought or sold in the market in normal market conditions.
- The Fund intends to replicate the Index by holding the equity securities, which make up the Index, in similar proportions to it.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be distributing shares (i.e. income will be paid on the shares quarterly).
- Your shares will be denominated in Sterling, the Fund's base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

For more information on the Fund, Share Class, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest

Entry Charge	None*
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Share Class over each year

Ongoing Charges	0.07%**
-----------------	---------

Charges taken from the Share Class under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Past performance is not a guide to future performance.

The chart shows the Share Class's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Share Class's net asset value at each year-end. The Fund was launched in 2000. The Share Class was launched in 2000. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

† Benchmark:FTSE 100 Index™ (GBP)

Historic performance to 31 December 2021

* As at 17th July 2019, the benchmark index converted from a total return series to a net of tax total return series. Historic performance of the benchmark index has been simulated to reflect this change and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table.

Practical Information

- The depositary of the Fund is State Street Custodial Services (Ireland) Limited.
- Further information about the Fund and the Share Class can be obtained from the latest annual report and half-yearly reports of iShares plc. These documents are available free of charge in English and certain other languages. These can be found, along with other information, such as details of the key underlying investments of the Share Class and share prices, on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser.
- Investors should note that the tax legislation that applies to the Fund and Share Class may have an impact on the personal tax position of your investment.
- The Fund is a sub-fund of iShares plc, an umbrella structure comprising different sub-funds. The Fund has one or more share classes. This document is specific to the Fund and Share Class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- iShares plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>.
- Under Irish law, iShares plc has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within iShares plc). In addition, the Fund's assets are held separately from the assets of other sub-funds. Assets and liabilities specific to a share class would be attributable to only that share class, however there is no segregation of liabilities between share classes under Irish law.
- Switching of shares between the Fund and other sub-funds within iShares plc is not available to investors. Only Authorised Participants dealing directly with the Fund may switch shares between share classes of the Fund subject to meeting certain conditions in the Fund's prospectus.
- The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

iShares MSCI World UCITS ETF

A sub-fund of iShares plc

USD (Dist) Share Class

ISIN: IE00B0M62Q58 Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI World Index, the Fund's benchmark index (Index).
- The Share Class, via the Fund is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- The Index measures the performance of large and mid capitalisation companies in developed countries worldwide. Companies are included in the Index based on a free float market capitalisation weighted basis and MSCI's size and liquidity criteria. Free float means that only shares available to international investors rather than all of a company's issued shares are used in calculating the Index. Free float market capitalisation is the share price of a company multiplied by the number of shares available to international investors. Securities that are liquid means that they can be easily bought or sold in the market in normal market conditions.
- The Fund uses optimising techniques to achieve a similar return to the Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be distributing shares (i.e. income will be paid on the shares quarterly).
- Your shares will be denominated in US Dollar, the Fund's base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

For more information on the Fund, Share Class, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan Fund ICVC

ISIN: GB00B4WKYF80

JPM Global Macro Opportunities Fund C - Net Accumulation

a Share Class of JPMorgan Fund ICVC – JPM Global Macro Opportunities Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objectives, Process and Policies

INVESTMENT OBJECTIVE

The Fund aims to provide positive investment returns, before fees, over a rolling 3 year period in all market conditions by investing in securities globally, using derivatives where appropriate. A positive return is not guaranteed over this or any time period and a capital loss may occur.

INVESTMENT PROCESS

Investment approach

- Investment process based on macroeconomic research to identify global investment themes and opportunities.
- Flexible and focused approach to take advantage of global trends and changes through traditional and non-traditional assets.
- Fully integrated, risk management framework provides detailed portfolio analysis.

Benchmark ICE BofA SONIA Overnight Rate Index

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator however the Fund will be managed without reference to its benchmark. The Benchmark has been chosen as it reflects the investment strategy for the Fund.

POLICIES

Main investment exposure Invests, either directly or through derivatives in equities, commodity index instruments, convertible securities, debt securities, currencies and cash and near cash. Issuers of these securities may be located in any country, including emerging markets.

The Fund may invest up to 100% in government and public securities and may also invest in below investment grade and unrated debt securities.

The Fund may invest up to 10% of its assets in onshore PRC securities including China A-Shares through the China-Hong Kong Stock

Connect Programmes and onshore debt securities issued within the PRC through China-Hong Kong Bond Connect.

Allocations may vary significantly and the Fund may be concentrated in, or have net long or net short exposure to, asset classes, markets, sectors or currencies from time to time.

The Fund is expected to have an annualised volatility of less than 10%. Under exceptional market conditions the realised volatility may be greater than expected.

Other investment exposures Small capitalisation companies and collective investment schemes.

Derivatives Used for: investment purposes, efficient portfolio management; hedging. Types: see [Fund Derivative Usage](#) table under [How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: 40% expected; 150% maximum. Global exposure calculation method: absolute VaR. Expected level of leverage from derivatives: 750% indicative only. Leverage may significantly exceed this level from time to time.

Currencies Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: flexible.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income.

Portfolio Transaction Costs A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmorgan.co.uk/kiid-glossary.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Investment risks Risks from the Fund's techniques and securities

Techniques	Securities	
Concentration	China	- Below investment grade debt
Derivatives	Commodities	- Unrated debt
Hedging	Convertible securities	Emerging markets
Short positions	Debt securities	Equities
	- Government debt	Smaller companies
	- Investment grade debt	UCITS, UCIs and ETFs

Other associated risks Further risks the Fund is exposed to from its use of the techniques and securities above

Credit	Currency	Interest rate
Liquidity	Market	

Outcomes to the Shareholder Potential impact of the risks above

Loss	Shareholders could lose some or all of their money.	Volatility Shares of the Fund will fluctuate in value.	Failure to meet the Fund's objective.

Morgan Asset Management, Client Administration Centre, PO Box 12272, Chelmsford, CM99 2EL.

Share prices can be obtained online at www.jpmorgan.co.uk/investor or by telephoning 0800 20 40 20 (or +44 1268 44 44 70 if calling from outside the UK).

Please note if you call J.P. Morgan Asset Management, calls may be recorded and monitored for security and training purposes.

Remuneration Policy The ACD's Remuneration Policy can be found on <https://am.jpmorgan.com/gb/en/asset-management/gim/awm/legal/emea-remuneration-policy>. This policy includes details of how remuneration and benefits are calculated, including responsibilities and composition of the committee which oversees and controls the policy. A copy of this policy can be requested free of charge from the ACD.

Tax The Fund is subject to UK tax regulations. This may have an impact on an investor's personal tax position.

Legal Information JPMorgan Funds Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

JPMorgan Fund ICVC consists of separate Funds, each of which issues one or more Share Classes. This document is prepared for a specific Share Class. The Prospectus and annual and semi-annual financial reports are prepared for JPMorgan Fund ICVC.

The Fund is part of JPMorgan Fund ICVC. The assets and liabilities of each fund in JPMorgan Fund ICVC are segregated by law. This means that the assets of the Fund belong exclusively to the Fund and will not be used to pay the liabilities of any other person or body, including JPMorgan Fund ICVC or any other Fund within JPMorgan Fund ICVC.

Switching and Conversion Investors may switch into Shares of another Fund of JPMorgan Fund ICVC or convert Shares in one Class in a Fund to Shares of another Class in the same Fund subject to meeting any relevant eligibility requirements and minimum holding amounts. Further information can be found in "section 4.3.10 - Switching and Conversion of Shares" of the Prospectus.

Privacy Policy You should note that, if you contact J.P. Morgan Asset Management by telephone, those lines may be recorded and monitored for legal, security and training purposes. You should also take note that information and data from communications with you may be processed by J.P. Morgan Asset Management, acting as a data controller, in accordance with applicable data protection laws. Further information about processing activities of J.P. Morgan Asset Management can be found in the EMEA Privacy Policy, which is available at www.jpmorgan.com/emea-privacy-policy. Additional copies of the EMEA Privacy Policy are available on request.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Legal & General Short Dated Sterling Corporate Bond Index Fund
Class C Accumulation - ISIN: GB00BKGR3F07**

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the performance of the Markit iBoxx GBP Corporates 1-5 Index, (the "Benchmark Index"). This objective is after the deduction of charges and taxation.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Benchmark Index is comprised of investment grade corporate bonds(a type of loan that pays interest) that are short dated (i.e. up to 5 years in maturity) and denominated in British Pounds.
 - The bonds that the Fund invests in will be primarily investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may also invest in money market instruments (such as treasury bills), cash, deposits, bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:

- reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund may be suitable for investors looking for a combination of growth and income by tracking the market in investment grade corporate bonds that are short dated and denominated in British Pounds as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk

Higher risk

Potentially lower rewards

Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invested.

You might get back less than you invest.
Further information on the risks of investing in this fund is contained in the
Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - The Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

LGIM

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.08%
Charges taken from the fund under certain specific conditions	
Performance fee	None

PAST PERFORMANCE

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at April 2022. This figure may vary from year to year.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the capital of the Fund.
- Other costs:**
- Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.16% for purchases and 0.16% for sales at 17 March 2022. The amount of the dilution adjustment may differ in future.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.
- Investors can get other practical information, including the latest prices, dilution adjustment and details of any other unit classes that are available, by calling us on **0370 050 0955** Monday to Friday between 9:00a.m. to 5:00p.m. Call charges will vary.
- This Fund is subject to the tax legislation of the United Kingdom, which may have an impact on each investor's personal tax position.
- The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.
- Details of our Remuneration Policy including our Remuneration Committee and how remuneration and benefits are calculated can be accessed from www.lgim.com/remuneration. A paper copy is also available free of charge upon request.

Non-UCITS retail scheme Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Lindsell Train UK Equity Fund, Accumulation Shares, (ISIN: GB00B18B9X76)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To achieve growth in capital (an increase in the value of the fund), growth in income (money available to be paid out by the fund) and provide a total return (a combination of income and capital growth) in excess of the FTSE All-Share Total Return Index after all costs and charges have been taken, over at least five years.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 70% of the fund in the shares of United Kingdom companies and up to 10% in the shares of companies listed on an exchange in the United Kingdom (which may include worldwide companies which are listed on an exchange in the United Kingdom).

The fund may also invest up to 20% in non-UK companies, (including emerging markets which are countries whose economies are progressing towards becoming advanced) cash and money market instruments (which are short term loans that pay interest). The fund will be concentrated and is unlikely to have more than 35 investments.

The Portfolio Manager will buy shares in companies that they expect to hold for long periods of time and, in their opinion, are profitable, long standing, of high quality, have strong balance sheets and which they expect to increase in value.

Other features of the fund:

- The fund is actively managed. The Portfolio Manager uses their expertise to select investments for the fund. Whilst the fund aims to outperform the FTSE All-Share TR Index (which has been selected as it represents broad exposure to UK companies) the fund is not constrained by the index and will take positions in individual stocks that differ significantly from the index.
- The fund can invest across different industry sectors in accordance with the above limitations.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.

- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Concentrated Fund Risk: The fund intentionally holds a small number of investments and so will be more concentrated than many other funds. The fund may also invest in stocks with a particular industry, sector or geographical focus. This means that the performance of a single stock, industry, sector or geographical region within the fund has a greater effect (loss or gain) on the value of the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.64%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses for the year ended 30 November 2021. The ongoing charges are taken equally from the income and capital of the fund. It excludes portfolio transaction costs, except entry/exit charges paid by the fund when buying or selling units in other collective investment schemes.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in July 2006.
- The share class was launched in July 2006
- Performance is calculated on a total return basis in Pounds Sterling.

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Global Innovation Fund is a sub-fund of the Liontrust Investment Funds I and categorised as a UCITS scheme. This document is based upon the C Acc class (ISIN: GB00B8DLY478). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- To generate long term (5 years or more) capital growth.

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund invests at least 80% in shares of companies selected from across the world. The Fund may also invest up to 20% in other eligible asset classes as detailed within the prospectus.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The fund managers believe the key to generating outperformance is through high conviction, long-term, research-led company selection. The key elements to the investment process are as follows:
 - Identifying innovative businesses. The fund managers believe innovative businesses provide excellent opportunities for strong long-term shareholder returns and resilience to the threats of disruptive economic change. The fund managers seek to invest in innovative businesses that:
 - i) create value for their customers through superior new products and business models; and
 - ii) capture an adequate share of this value for their shareholders through the possession of barriers to the forces of competition.
- The portfolio is actively managed and the fund managers only invest the portfolio in businesses in which they have high conviction of achieving strong long-term shareholder returns. This typically leads to the fund having a high active share against its benchmark(s).
- The portfolio is diversified by geography and sectors, and the managers seek to ensure that the performance of the individual businesses they invest in have a meaningful impact on the fund's long-term returns.
- The portfolio aims to be liquid in all market conditions.
- The Liontrust Global Innovation Fund focuses on investing in innovative businesses, based on the managers' belief that innovation is the biggest driver of shareholder returns.
- This approach to investing is especially effective in an era such as the present one where innovation and disruptive change are the central features of the economy. In these conditions, businesses that can innovate stand the best chance of succeeding over time.
- In assessing an innovative business as an investment, it is essential to judge it not by its novelty or technological sophistication but by the value it creates for its customers and its ability to capture an adequate share of this value for its shareholders.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily for its exposure to global equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- This Fund may have a concentrated portfolio, i.e. hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and

down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year

Ongoing charges	0.88%
-----------------	-------

Charges taken from the Fund under certain specific circumstances

Performance fee	None
-----------------	------

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 31 December 2001.
- The C Acc share class launch date is 31 December 2001.
- The base currency of the Fund is pounds sterling.

- The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges** figure is based on expenses as at 31 December 2021. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges, please see the Charges and Expenses section of the Fund's prospectus, which is available electronically at www.liontrust.co.uk.

Practical information

Authorisation	This Fund is authorised in the UK and regulated by the Financial Conduct Authority.
Depositary	Bank of New York Mellon (International) Ltd.
Investment adviser	Liontrust Investment Partners LLP.
Further information	Copies of the prospectus and the latest annual and half-yearly reports, which are the primary source of additional information, are available, without charge, from Liontrust Fund Partners LLP, 2 Savoy Court, London, WC2R 0EZ. They are also available electronically at www.liontrust.co.uk .
Taxation	UK tax legislation may have an impact upon your own personal tax position.
Fund prices and other information	The Fund's last published price is available from Liontrust Fund Partners LLP at www.liontrust.co.uk or by writing to us at 2 Savoy Court, London, WC2R 0EZ, or by telephoning 020 7412 1777 during business hours (9.00am - 5.30pm).
Remuneration	Information on the current remuneration policy of the Fund, including a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, is available at www.liontrust.co.uk . KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Inc class (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.
The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors. For a fuller explanation, please visit www.liontrust.co.uk.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
 - Intellectual property
 - Strong distribution channels
 - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

LIONTRUST SPECIAL SITUATIONS FUND

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year

Ongoing charges	0.81%
-----------------	-------

Charges taken from the Fund under certain specific circumstances

Performance fee	None
-----------------	------

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 10 November 2005.
- The I Inc share class launch date is 01 November 2010.
- The base currency of the Fund is pounds sterling.

- The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges** figure is based on expenses as at 31 December 2021. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges, please see the Charges and Expenses section of the Fund's prospectus, which is available electronically at www.liontrust.co.uk.

Practical information

Authorisation	This Fund is authorised in the UK and regulated by the Financial Conduct Authority.
Trustee	Bank of New York Mellon (International) Ltd.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

M&G Absolute Return Bond Fund

a sub-fund of M&G Investment Funds (10)

Sterling Class I – Accumulation shares ISIN no. GB00BD6FFN71

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income of at least the Sterling Overnight Index Average (SONIA) plus 2.5% a year, before charges, over any three-year period.

The fund aims to achieve this while seeking to limit losses and minimise the degree to which the value of its assets changes over time. Managing the fund in this way reduces its ability to achieve returns significantly above SONIA plus 2.5%.

SONIA reflects the average interest rate that banks pay to borrow sterling overnight from other financial institutions.

There is no guarantee that the fund will achieve a positive return over any period. Investors may not get back the original amount they invested.

Core investment: At least 70% of the fund is invested in bonds (including fixed, variable and index-linked bonds), currencies, cash and near cash. These assets may be issued anywhere in the world and denominated in any currency. The fund typically invests directly in these assets. It may also invest via derivatives or through funds.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund managers take a flexible approach, investing across different bond markets and currencies according to where they identify value. The fund managers have the freedom to adjust the fund's sensitivity to interest rate movements, as well as the blend of bond and currency exposures based on an assessment of macroeconomic, asset, sector and stock-level factors. The fund typically aims to have a high level of diversification in individual bond selection and across investment themes and sources of return. The fund manager seeks to achieve the performance objective while managing the fund's volatility and limiting losses during difficult market conditions.

Benchmark: SONIA + 2.5%

The benchmark is a target which the fund seeks to achieve. The rate has been chosen as the fund's benchmark as it is an achievable performance target and best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance objective and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which assets to buy, hold and sell in the fund.

For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a glossary providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

- The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 3 because its Net Asset Value has shown very low to medium rises and falls in value historically.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- An 'absolute return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	0.45%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 30 September 2021. This figure may change from year to year. It excludes portfolio transaction costs.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation includes UK taxes. It does not take into account the entry and exit charges but does take into account the ongoing charge and the Performance fee, as shown in the charges section.
- The fund launched on 13 December 2016 and the Sterling Class I Accumulation share class launched on 13 December 2016.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.
- Prior to 20 July 2021 the benchmark was 3-month GBP LIBOR + 2.5%. With effect from 20 July 2021 the benchmark will be SONIA +2.5%.

Practical information

The depositary is NatWest Trustee and Depositary Services Limited.

For more information about this fund, please visit www.mandg.co.uk/literature where you will find a copy of the Prospectus, Instrument of Incorporation and the latest annual or interim Investment Report and Financial Statements. These documents are in English and are available free of charge. Our website also provides other information such as share prices.

UK tax laws apply to the fund, and this may affect your personal tax position. Please speak to an adviser for more information.

M&G Securities Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the fund.

The fund is a sub-fund of M&G Investment Funds (10), an umbrella Open Ended Investment Company (OEIC). The Prospectus, and annual or interim Investment Report and Financial Statements contain information about all of the sub-funds in M&G Investment Funds (10).

The assets of each sub-fund within the umbrella OEIC are segregated by law. This means that the assets belong exclusively to that sub-fund and shall not be used or made available to pay the debts of any other sub-fund or the umbrella OEIC.

You may switch between other sub-funds of M&G Investment Funds (10). An entry charge may apply. Details on switching are provided in the Important Information for Investors document and the fund's Prospectus, or by calling M&G Customer Relations on 0800 390 390.

Other share classes may exist for the fund as set out in the relevant Prospectus.

For up-to-date details of the staff remuneration policy that applies to M&G Securities Limited, including a description of how remuneration and benefits are calculated, the make-up of the remuneration committee, and the identities of persons responsible for awarding the remuneration and benefits, please visit www.mandg.co.uk/remuneration. We will provide a paper copy of this information, free of charge, if you require one.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

M&G UK Inflation Linked Corporate Bond Fund

a sub-fund of M&G Investment Funds (10)

Sterling Class I – Accumulation shares ISIN no. GB00B460GC50

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to protect the value of capital and income from inflation by providing combined income and capital growth, net of the ongoing charge figure, that is consistent with or higher than UK inflation (as measured by the UK Consumer Prices Index), over any three-year period.

There is no guarantee that the Fund will achieve its objective over this, or any other, period. The income distributions and the value of your investment may rise and fall, and you may not get back the amount you originally invested.

Core investment: At least 70% of the fund is invested, directly or indirectly, in high quality corporate bonds, typically inflation-linked corporate bonds and floating rate notes, from anywhere in the world, including emerging markets. These bonds are denominated in sterling or hedged back to sterling.

The fund gains indirect exposure to inflation-linked bonds by combining inflation-linked government bonds with derivatives.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund is designed to provide protection from the negative effects of inflation by being positioned with a low sensitivity to movements in interest rates. Spreading investments across issuers and countries is also an essential element of the fund's strategy.

Benchmark: UK Consumer Prices Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a glossary providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

- The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 2 because its Net Asset Value has shown low rises and falls in value historically.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	0.43%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 15 February 2021.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.45%. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation excludes UK taxes from 01 October 2016. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The fund launched on 16 September 2010 and the Sterling Class I Accumulation share class launched on 16 September 2010.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.

Practical information

Royal London Absolute Return Government Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Asset Management Funds plc ISIN: IE00BP268849
FundRock Management Company S.A. as its Management Company

Objectives and investment policy

Objective The investment objective of the Fund is to target absolute positive capital growth. The Fund seeks to achieve its investment objective by outperforming its benchmark, the Sterling Overnight Index ("SONIA") on an annual basis by 2.5% over rolling three year periods and aims to provide positive performance over 12 month periods.

Policy The Fund primarily invests in a portfolio comprising fixed and/or floating rate investment grade government bonds and inflation linked bonds issued by the G10 Member States, and financial derivatives. The Fund may use derivatives to achieve the investment objective, for hedging against anticipated movements in a market or a security, or where it is more economically effective than directly holding the underlying asset as well as for efficient portfolio management purposes. The Fund may use derivatives to take 'long' positions and 'short' positions. The Fund will simultaneously take long positions in assets which it believes are undervalued and short positions in assets that it believes are overvalued.

The Fund uses derivatives to provide investors with a similar return to any share class issued in the working currency of the Fund (sterling). The Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track it. While the Fund may invest in investments which are constituents of the Benchmark, the Fund will be actively managed and its portfolio will not be constrained by reference to any index or only invest in instruments within it.

More information on the sustainability factors for this fund can be found in the prospectus on our website at

www.rlam.co.uk

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

You can buy and sell your shares on each working day in London, except public holidays, at 5.00pm (Irish time) if you tell us before 5.00pm (Irish time) that you want to do so. Instructions received after 5.00pm (Irish time) will be processed at 5.00pm (Irish time) on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 2 because its share price has shown a low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

Derivative Risk Derivatives are highly sensitive to changes in the value of the underlying asset which can increase both Fund losses and gains. The impact to the Fund can be greater where they are used in an extensive or complex manner, where the Fund could lose significantly more than the amount invested in derivatives.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
Exit charge	None

Charges taken from the fund over a year:

Ongoing charge	0.40%
-----------------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
------------------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to cover the expenses of the Fund. This figure does not include portfolio transaction costs.

Practical information

Depositary: State Street Custodial Services (Ireland) Ltd.

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund's Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlams.co.uk. The Prospectus and shareholder reports are in English.

This document describes one share class of the Fund. The Prospectus and annual and semi-annual shareholder reports are prepared for the entire fund across all share classes.

For fund performance and most recent share price, visit www.rlams.co.uk.

The Fund is a sub-fund of Royal London Asset Management Funds plc, which is an umbrella fund with segregated liability between sub-funds. As a consequence, the holdings of one sub-fund are kept separate from the holdings of other sub-funds and your investment in the Fund cannot be used to pay the liabilities of any other sub-fund. Investors may exchange their shares in the Fund for shares in other sub-funds of Royal London Asset Management Funds plc.

Should you wish to switch share classes or funds, please see the "Switching" section of the Prospectus for details.

Tax: Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of their investment in the Fund.

Contact your adviser to discuss tax treatment, suitability of this investment, and other questions.

Notices: FundRock Management Company S.A. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

This Fund and Royal London Asset Management Funds plc are authorised in Ireland and regulated by the Central Bank of Ireland.

The Management Company is authorised in Luxembourg and supervised by the Commission de Surveillance du Secteur Financier (CSSF).

A paper copy of the detailed and up-to-date remuneration policy of the Management Company, including a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, is available free of charge at its registered office and on the website www.fundrock.com, under section "Fund documentation".

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 17 November 2014 and the share class on 23 February 2015.

The Royal London Absolute Return Government Bond Fund (Accumulation - Class M Shares) in GBP

Past performance is not a guide to future performance and may not be repeated.

The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sanlam Real Assets Fund – Class A Distribution Sterling

A sub-fund of Sanlam Universal Funds plc (the "Company")

Managed by Sanlam Asset Management (Ireland) Limited

ISIN: IE00BDFDL125

Objectives and Investment Policy

Investment objective

The investment objective of Sanlam Real Assets Fund (the "Fund") is to target capital growth over the long term and to outperform inflation through a portfolio of investments giving exposure to a range of real assets.

Investment Policy

The Fund is actively managed and invests up to 100% of its assets primarily in a global range of equity securities of companies listed on stock exchanges set out in Appendix I of the Prospectus who derive their value from underlying real assets. For this purpose "real assets" are physical assets that have value due to their substance and properties e.g. housing, warehousing, infrastructure, utilities, aviation and renewable energy.

The Fund may invest up to 30% of its assets in real estate investment trusts ("REITS").

The Fund may invest on an ancillary basis up to 20% of its assets in fixed income securities such as, including but not limited to corporate bonds, sovereign debt and money market instruments such as investment grade corporate bonds and government issued securities of less than 1 year maturity and cash deposits.

The Fund may invest in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes. FDI are financial instruments the value of which is linked to the expected future price movements on underlying assets, for example an option is a contract that gives the owner the right, but not the obligation, to buy or sell assets at a

specified price before a specified date. Futures are contracts that create an obligation to buy or sell another security on or before a specified future date.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie

You can sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Ireland and the UK.

Your shares may pay you income, any income you may be entitled to will be paid on a monthly basis.

The Fund measures its performance relative to a benchmark index (a composite of the Consumer Price Inflation rate of G10 region) for reference or investor communication purposes, including in the Company's annual and half-yearly reports. Whilst the Fund has a target return of CPI +4%, the performance of the Fund relative to the benchmark index is not factored in any way into the investment process.

Recommendation: The Fund is suitable for investors with a time horizon of 5 years.

Risk and Reward Profile

Why is this Fund in category 4?

Investing in the shares of companies listed on stock exchanges globally means that currency exchange rate fluctuations will have an impact on the Fund.

The price of shares and the income from them may fall as well as rise and you may not get back the amount you have invested.

The Fund may charge fees and expenses against the capital of the Fund, accordingly the value of your potential return from the Fund may be diminished.

The ability to trade REITS in the secondary market may be more limited than other stocks.

Investment in debt securities may lead to credit risk where any of the corporations or governments which issue the debt securities become insolvent or suffer financial difficulties. The debt securities may in some cases be below investment grade, which means that while they may deliver a better return, there is potentially a higher risk of default and loss to the Fund.

The Fund may use FDI for efficient portfolio management and hedging. It may be that the use of FDI causes losses to the Fund.

What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a

risk of suffering large losses.

A **Category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1).

More about this rating:

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, such as is used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
Switching charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.00%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on the expenses for the previous 12 month period ending December 2021. This figure, which excludes portfolio transaction costs, may vary from year to year.

You can find out more details about the charges by looking at the "Charges and Expenses" section of the prospectus.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in British Pounds.

The Fund launched on 22 August 2018. This class started to issue shares on 2 November 2018.
