Speeches

2022 - [How to set up a TypeScript monorepository in Gitlab CI](#)

2021 - [AdBlock: features and advanced blocking methods](#)

Vladislav Yandimirkin

Lead Node.js Developer

Experience

Jan 2023 - Ongoing

Yucca.Digital | <https://yucca.digital>

Senior Node.js Engineer, Engineering Team Lead

Development for services for monitoring of 30k+ hardware devices TypeScript, Node.js, Postgres, Redis, RabbitMQ, TypeORM, Kysely, Redis, Jest, K8s, Golang.

Managing a team with 8 developers, QA, SRE, project management, product management, hiring.

Upgraded monitoring system processes for more reliable and high-performance solution.

Feb 2022 - Dec 2022 (9 months)

Sberbank | <https://ads.sber.ru>

Engineering Team Lead

Managed a three high-load projects for advertisement platform using Nest.js, TypeScript, Browser API, Fastify, Inversify, monorepos and communication between multiple departments, hiring new employees.

Mentoring and lead five JavaScript/Node.js developers and QA engineers.

Established a standard development workflow, linter rules, set up continuous integration (CI), managed JIRA tasks and release management.

Constructed an basement for performance templates with Preact and Node.js.

Created a performance metrics for a product and its performance.

Dec 2017 - Feb 2022 (4 years)

Rambler&Co | <https://rambler-co.ru>

Node.js developer, Lead Node.js Developer

Established architecture and development services entirely from the ground up, utilizing technologies such as Node.js, TypeScript, RabbitMQ, Nest.js, PostgreSQL, and S3-like storage. Also implemented comprehensive unit and integration tests with Jest.

Created dynamic styling for advertisement templates with seamless integration and several major services, using Nest.js, MariaDB.

Created a monitoring and metrics system, utilizing Grafana and Clickhouse

By implementing new operational processes and mechanisms, I successfully boosted profits by over 40%.

Dec 2015 - Nov 2017 (1.5 years)

NaturiGroup | <https://naturi.su>

Senior Software Web Developer

I conceived and constructed an expansive CRM system aimed at automating critical construction business operations Node.js, MongoDB, Angular.js, and Socket.io.

Create and manage website using PHP, Wordpress, Modx

Feb 2014 - Oct 2015 (1 year)

InfinetGroup

I designed and developed a system to monitor backup generator status from scratch. The system was built using MySQL, PHP, JavaScript, and Wammu for SMS-communication.

Participate in amateur table tennis tournaments and training every week, love karting

Enjoy to study financial markets of Russia, the USA, and China

Love to write services in Go and study it in my free time.
